

MONTANA ATHLETIC CLUB'S

keeping you safe series

TODAY'S TOPIC: EQUIPMENT SANITIZATION

The GenEon Mist Fogger allows for cleaning, sanitizing and disinfecting large open areas without the need for direct surface contact. At the MAC, that means getting equipment sanitized quick - with minimal disturbance to our members and guests.

The Mist fogger/sprayer is used in medical facilities, hotel rooms, ambulances, cruise ships - anywhere you need sanitization in hard to reach places. The fogger employs a sanitizing/disinfecting electrolyte that will kill germs and viruses, yet contains no harsh chemicals and is safe to use around humans. In fact, the GenEon system is used in commercial food production areas.

MAC uses the fogger/sprayer several times during the day and extensively after closing, in all areas of the facility. It is important to note - this does not replace our nightly cleaning and disinfecting regime, but supplements those efforts.

MONTANA ATHLETIC CLUB

Questions on how we can help you get fit? Just call:

837-2582

MontanaAthleticClub.com

Our foremost concern is our Members and Guests. Not only in protecting them from COVID and other germs, but to ensure they are staying fit and healthy, both in body and mind.

STUDIES HAVE PROVEN THAT STAYING FIT HELPS NOT ONLY FIGHT OFF ILLNESS, BUT LESSENS THE IMPACT IF YOU ARE INFECTED.

This pandemic has also stressed our social life. Part of our mission is to provide a place for people to meet and socialize. While this has been difficult with all the restrictions in place, we are continually looking for ways to keep you safe.

We are proud of our members/guests for following the guidelines to ensure we can stay open for you.

WEAR MASKS IN COMMON AREAS (NOT REQUIRED WHILE WORKING OUT), SOCIAL DISTANCE AND JUST BE CAREFUL.

The Bigfork community is strong and resilient. We will get through this together!
